DETAILED ACTION

Allowable Subject Matter

1. Claims 10-22 are allowed.

The following is an examiner's statement of reasons for allowance: With respect to claims 10-22, the prior art on record, Moriya (US 5,867,475) teaches a data-randomizing method for an optical disk apparatus adapted to record data on recording medium by light, and read data on the recording medium by utilizing a difference in reflectance [see column 3, lines 47-59], comprising: adding seed data (i.e., initial value) for randomizing, to subject data to be recorded on the recording medium [column 9, lines 45-63 and column 10, lines 13-22], and determining at least one bit randomized data by operating at least one bit data added seed data to the data and multiple bit randomized data, which was made from at least one bit added seed data and multiple randomized bit data [column 10, lines 13-22 and lines 33-44]. Moriya further teaches using different value of seed data at an interval of eight sectors [column 11, lines 7-14]. Furthermore, Whaley (US 6,052,817) teaches a data randomizing method wherein a different value of seed data is used as the seed data for every time of writing data [column 2, line 53 – column 3, line 6]. However, the prior art on record does not disclose, teach or fairly suggest a data-randomizing method wherein the seed data is data which is produced by using a different value for every time of rewriting data to a same address location of the recording medium.

Examiner would further point out that, the examiner is interpreting the claim to be statutory, since determining of randomization data results in real world result and therefore renders the claim to be tangible.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the

issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
